

**Schedule:** August 2015 to November 2015      **Location:** Winnebago and Outagamie Counties (Breezewood Lane – WIS 15)

**Description:** Work on this contract consists of concrete repair and replacement, high friction surface treatment, and polymer overlay.

**September 7 to September 11:** The contractor continued concrete pavement repairs in the northbound lanes at Breezewood Lane working north. Repairs were completed in all through traffic lanes. Lane shifts for the placement of high friction surface treatment and polymer overlay were completed near Winchester Rd.

**September 14 to September 18:** The contractor will continue concrete pavement repairs in the northbound and southbound lanes in Winnebago County. Placement of pavement marking will begin in the northbound lanes near Breezewood Lane working north. High friction surface treatment and polymer overlay near Winchester Rd will begin.

**Traffic Impacts:** I-41 will have nightly single lane and double lane closures each night from approximately 6 p.m. to 6 am. These closures will be in place each night from Monday night through Friday night. Some single lane closures are anticipated during daytime off-peak hours and on weekends. Starting Friday, September 11, there will be a single lane closure in effect for approximately two weeks between US 10 and Winchester Rd in both northbound and southbound lanes.
